

Lab 8: Circular Linked List

Insert At Beginning:

```
main.c
1  #include<stdio.h>
2  #include<stdlib.h>
3  struct Node{
4      int data;
5      struct Node *next;
6  };
7  struct Node *head=NULL;
8  void insertBeginning(int value){
9      struct Node *newNode=(struct Node*)malloc(sizeof(struct Node));
10     newNode->data=value;
11     if(head==NULL){
12         newNode->next=newNode;
13         head=newNode;
14         return;
15     }
16     struct Node *temp=head;
17     while(temp->next!=head)
18         temp=temp->next;
19     newNode->next=head;
20     temp->next=newNode;
21     head=newNode;
22 }
23 void display(){
24     struct Node *temp=head;
25     do{
26         printf("%d -> ",temp->data);
27         temp=temp->next;
28     }while(temp!=head);
29     printf("(back to head)\n");
30 }
31 int main(){
32     insertBeginning(10);
33     insertBeginning(20);
34     insertBeginning(30);
35     display();
36 }
```

Output

```
30 -> 20 -> 10 -> (back to head)
```
